ALBUQUERQUE'S MAGNIFICENT NEW HIGH SCHOOL BUILDING READY FOR FALL OPENING

What is regarded as the best high school building in the southwest will be thrown open to Albuquerque students with the beginning of the new school term on August 21. The new structure, which cost \$120,000 with the money put into the site, has been completed and the furniture is being installed. By August 21 everything will be in readiness for the new school year, and the high school students will find themselves housed in the finest, most modern, and best equipped secondary school building in this part of the world.

"The building is absolutely up to the minute in every detail," said Superintendent John Milne, head of the city school system, today. "It has such improvements as forced ventilation, automatically controlled heating, a vacuum cleaner system reaching every room, schoolroom clocks controlled by a master-clock, and electric annunciators; and the conveniences include a rest room and emergency hospital, and a demonstration room, or theater, such as is found in big colleges, for use in connection with the two laboratories. Rest room and demonstration room are the only ones of their kind in New Mexico high schools."

The new school building is three stories in height and has thirty rooms. On the ground floor are the superintendent's suite, vault for records, principal's office, emergency hospital and rest room, cooking room, model dining room, seating room, fitting room, manual training room, gymnasium, boiler room, and a furnace, which is part of the heating and ventilating plant. The gymnasium is big enough for a full basketball court and a spectators' gallery.

On the second floor are the physics and chemistry laboratories, and between them the demonstration room; eight recitation rooms, the main floor of the auditorium and two toilet rooms.

The auditorium will seat 845 people, and has a stage 44 feet wide. On the top floor is the study hall, library, seven recitation rooms and the gallery of the auditorium.

Throughout the building there is an ample number of closets, wash rooms, lavatories and the like.

The building represents the latest ideas in schoolroom sanitation, ventilation and lighting. The vacuum cleaner system is perfect—not a bit of dust will be raised in cleaning the rooms of every vestige of dirt. The furniture is of the latest and most approved design, the laboratory and cooking fixtures are the last word in their field. On every floor are hot and cold drinking fountains, and the gymnasium is equipped with shower baths.

"It is a fine building," said Mr. Milne today, "and the school has the finest facility, not only in New Mexico, but in the country. No stronger facility is to be found anywhere in a high school."

The school faculty is as follows: J. W. Giltner, a graduate of Indiana university, is principal; Ella La Bar, Indiana university, assistant principal.

Pat: Florence Palstrom, University of Minnesota, instructor in English; Susan Kinkhamer, M. A., University of Wisconsin, German; W. T. Mettjean, A. B., University of Minnesota, commercial work; Ruth Bright, A. B., Kansas Agricultural college, domestic science; E. C. Benson, graduate of the Oklahoma Normal school, manual training. All those instructors who have been on the faculty. New members are: Margaret Dickson, A. B., Loreda academy; V. A. Dunlap, A. B., B. S., University of Nebraska, science and athletics; Alice Davenport, A. B., M. A., University of Kansas, Latin; Lydia E. Padner, B. Ph., University of Wisconsin, physical culture; the other high school in the state has a physical culture instructor; Elsie Warnock, A. B., M. A., University of Nebraska.

Although the school will be open August 21, it will not be formally dedicated until the Saturday in November just before the meeting of the New Mexico Educational association. The directors of the association will be in the city that day, and members of educators from about the state are expected to be here in preparation for the big convention, and an impressive gathering of teachers is expected to attend the dedication.

Using the auspicious stage to seat distinguished visitors, the school board will have room for a big audience on the two floors of the auditorium. The stage can be set to accommodate 100 persons.

No details of the dedication program have yet been decided upon.

PREDICTS CANAL ON SEA-LEVEL EVENTUALLY

Chief Engineer of Defunct French Panama Canal Company Declares Future Will See His Theory Justified.

Panama, Aug. 15.—After having spent the better part of a week in an extended examination of the Panama canal, Philip Bunau-Varilla, chief engineer for the defunct New French Canal company, is still of the opinion that ultimately the isthmus of Panama will witness the construction of a sea level canal. He declares that at the end of the first twenty years of operation of the present lock canal it will be found necessary to reconstruct that waterway in order to take care of the increased traffic that will use it.

Bunau-Varilla is emphatic in his statement that within twenty years the present Panama canal will have reached the limit of its carrying capacity. 25,000,000 tons annually, and that then it will be found that only a sea level canal will adequately care for the traffic. The former canal engineer makes it plain, however, that he does not mean to criticize the construction of the present lock canal, but maintains that this is merely the secondary period in the construction of a waterway across the isthmus.

Bunau-Varilla has spent most of his time since his arrival on the isthmus in making voyages of inspection along the canal. In many of his trips he was the guest of Col. George W. Goethals, governor of the Panama canal, who explained the work to his distinguished visitor. He has made a number of motor boat trips through the Culebra cut and Gatun lake. Besides this he spent many hours in a careful examination of the Gatun dam and the spillway, and watching the work at Cucaracha slide. He was taken from dredge to dredge and chatted with many of the workmen. He was considerably impressed with the capacity for work shown by the huge 15-yard dipper dredges, both of which are actively engaged in pushing back the hitherto advancing toe of the slide.

The Leader's Big Seven Day August Clearance Sale started today and will continue all next week. Big leaders each day. Don't fail to attend.

We Develop Any Roll of Films for 10c

We are also making special prices on printing. While there is a reduction in price there is no reduction in quality of work.

We have kodaks ranging in price from \$1.00 to \$60.00. No need to be without a kodak.

WRIT OF CERTIORARI ASKED BY THE CITY

City Attorney Thomas N. Wilkerson has asked for a writ of certiorari in the case of Mrs. M. A. Romero against the city. Mrs. Romero obtained a judgment of \$100 by default. She sued to recover damages for injuries alleged to have been sustained from a fall into a hole in a street. The judgment was obtained before Mr. Wilkerson was appointed city attorney and it is contended that the city had no opportunity to put in a defense.

PORTER SET FREE ON \$20,000 BOND

J. L. Porter, charged with the murder of Ralph E. Connel near Tulare, who was shot from ambush in June, was set free on a \$20,000 bond at Alamogordo yesterday by Judge Herbert F. Reynolds of this city, who heard habeas corpus proceedings for Porter, sitting for Judge Medler at the request of the state supreme court. Judge Medler had declined to sit in the case.

Porter furnished the bond at once.
